Profile

Frontend specialist with expertise in Vue.js, Nuxt, and modern web architectures, focused on performance, scalability, and user experience. Skilled in AG Grid, WebSockets, drag-and-drop interactions, and caching strategies to optimize complex applications. Experienced in building CRMs, ERPs, and e-commerce platforms, as well as integrating design systems and real-time features. While my main focus is frontend, I can work on the backend when needed using Laravel and SQL. Highly adaptable and able to quickly learn and work with any frontend framework as needed. Trusted as a lead frontend developer in multiple projects, ensuring high-quality and maintainable code.

Experience

Vue.js / Nuxt.js Developer (Contractor)

DeltaCoders

Developed new features, fixed bugs, and refactored an existing project. Implemented AG Grid for handling large datasets, significantly improving performance. Led a major refactor to remove redundant files and introduced Vue Query for efficient caching. Also built several MVPs from scratch.

JUL 2024 - TODAY

Remote
Lisbon, Portugal

Vue.js Developer (Full time)

SJAC

Optimized code by centralizing functionality, improving maintainability. Enhanced authentication by enabling seamless reauthentication for expired tokens, supporting MFA and authenticator codes. Implemented a notification system UI and resolved critical bugs.

NOV 2024 - JAN 2025

Remote
Washington DC, US

Vue.js Developer (Full time)

ZOOMcatalog

Developed a custom design system aligned with brand guidelines. Built and optimized features using WebSockets, implemented drag-and-drop functionality, and automated catalog scanning to extract product images and apply branding. Improved project loading speed and maintained UI across all company products, eventually becoming the sole frontend developer due to trust in my work.

APR 2021 - NOV 2024

Remote
Colorado, US

Vue.js + Laravel Developer (Full time)

Controlla

Joined in the early stages, contributing to CRM and ERP development using Vue.js, Laravel, and SQL. Built landing pages, integrated OpenPay for payments, and developed mobile apps in Flutter, publishing them to the App Store and Play Store. Frequently worked independently, delivering key projects for clients.

DEC 2018 - APR 2021

On-Site
Chihuahua, Mexico

PHP Developer (Full time)

Xnet

Maintained invoice systems, WordPress sites, and MS Access databases. Developed PHP-based solutions and completed networking projects for high-profile hotels in Acapulco.

JUL 2018 - DEC 2018

On-Site
Chihuahua, Mexico

Designer (Part time)

ITSNCG

Worked part-time as a marketing designer, video editor, social media manager, and event photographer while studying. Created promotional materials, designed magazines, posters, and social media content, and managed event photography.

SEP 2016 - MAY 2018

On-Site
Chihuahua, Mexico

Personal Projects

Inventario Fácil

A Vue 3-based inventory system for small entrepreneurs. Built with ShadCN, Vue Query, Tailwind, Supabase (Auth, PostgreSQL, Edge Functions), Netlify, and Stripe. Features include multi-workspace support, product/customer management, sales tracking, statistics, low stock alerts, customizable branding, and e-wallet discounts.

Invoice Tool

A simple and efficient invoicing tool for freelancers, built with Vue 3, Supabase (Auth, PostgreSQL), Tailwind, PrimeVue, and HTML2PDF.js. Features live invoice preview, PDF generation, and a dashboard to manage saved invoices, making it easy to create, store, and download professional invoices in seconds.
